

INTERMOCO
MONITORING AND CONTROL

23 January 2009

Strategic Alliance with EIA

Intermoco Limited (ASX:INT), a leading provider of energy and water management solutions through its Utiligy brand, is pleased to announce the signing of a strategic alliance with Energy Impact Australia (EIA), a company that provides lighting maintenance products and services to the retail, commercial and industrial markets around Australia.

Under the strategic alliance, Utiligy and EIA will work closely together to actively promote and market each others products and services to its existing client base and to new customers.

The alliance with EIA brings significant benefits to Utiligy. EIA will actively promote Utiligy's energy and water management solutions to its clients thereby enhancing Utiligy's marketing and distribution network and increasing its potential revenue opportunities.

Utiligy will also benefit from introducing EIA's services and products to its clients. EIA will deliver a full lighting maintenance and product portfolio under the banner of Utiligy.

Another significant benefit of the strategic alliance is that it gives Utiligy access to EIA's subsidiary Globepro's. Globepro's are a well-established national company that look after lighting maintenance for most major retail and commercial corporations throughout Australia. Their head office is based in Melbourne, with a fleet of vehicles and technicians that service all states.

Furthermore, EIA has been selected on the Department of Defence's Panel to subcontract for lighting maintenance services contracts in the southern Victorian region which will lead to substantial opportunities for Utiligy.

The strategic alliance with EIA further enhances Utiligy's capabilities as a holistic solutions provider to meet the growing demand for energy and water management.
