Intermoco signs Strategic Business Partner Agreement with NEC

Intermoco Limited (ASX:INT) (Intermoco), a leading provider of metering and monitoring solutions for energy and water management, is pleased to announce that it has signed a Strategic Business Partner Agreement with NEC Australia. NEC is a leading global supplier of information and communications technology employing 154,000 people worldwide through 334 subsidiaries and generating \$62 billion in revenue.

This Strategic Business Partner Agreement enables both companies to market and sell each other's products and services within the NEC Managed Service customer base and Intermoco's Embedded Network customer base.

This is a significant development for Intermoco as it greatly enhances the company's sales platform and allows it to offer additional products and services to its embedded networks customers.

Leveraging Intermoco's embedded networks is a strong focus of the company's strategic direction and a key driver of its growth plans. This agreement will enable Intermoco to offer voice and data products and services in addition to its core metering.

The agreement also gives Intermoco the opportunity to expand its operations by leveraging NEC's national and international presence.

Commenting on the signing of this Strategic Business Partner Agreement, Intermoco's Executive Chairman and Chief Executive Officer Mr Bob Gestro said:

"We are very excited to become partners with a leading global company in NEC. At Intermoco we are focused on providing an end-to-end integrated suite of products to our customers and this agreement further enhances our unique product offering and will be an important driver of future sales growth for our business"
