MONITORING AND CONTROL

14 January 2009

\$16 million projected sales within Ausmeter

Intermoco Limited (ASX:INT), a leading provider of energy and water management solutions through its Utiligy brand, is pleased to announce that its wholly owned Ausmeter business has been selected to deliver up to \$16 million of new metering projects over the next two years.

The projects are for the supply of metering & communication equipment in high rise apartment blocks to two major utility companies throughout the east coast of Australia. These projects are the result of the successful completion of extensive trials over the past 6 months. First orders to the value of \$500,000 have already been received in January 2009.

Ausmeter is being rebranded Utiligy Gas and is now fully integrated into the Utiligy business model.

The Utiligy group of brands brings together a suite of solutions to help customers manage electricity, gas and water consumption. Utiligy helps customers monitor and measure their energy and water consumption and then provides solutions to help reduce consumption.

The \$16 million in future projects is an important step in the growth of the company following the business restructure and board and management changes that began in May 2008.

Intermoco Chief Executive Officer Mr Jeff Robertson commented “We are very excited about the orders coming through for our energy and water management solutions. The market for our solutions is growing strongly and we are actively pursuing opportunities.”
