ASX Announcement

20 January 2009

### **Distribution Agreement for Ecobulbs**

Intermoco Limited (ASX:INT), a leading provider of energy and water management solutions through its Utiligy brand, is pleased to announce it has reached an agreement with Energy Mad Limited (Energy Mad) to distribute and sell their range of unique energy saving Ecobulbs™ into the Australia market.

The distribution agreement is for a period of two years commencing in January 2009 and gives the Company the ability to generate substantial revenue from the Ecobulb™ products.

The Ecobulb™ is Australasia's highest performance energy saving bulb. Ecobulbs are manufactured to the highest quality and are the most environmentally friendly on the market with the lowest levels of mercury than any other energy saving bulb.

The Ecobulb™ has approval for use from Sustainability Victoria and the Victorian Energy Efficiency Target schemes and will be rolled out through our electricity networks.

It gives Utiligy the ability to offer its clients energy reduction solutions and allows the Company to access a range of new markets for Ecobulb™ downlights and bulbs such as new homes, hotels and other commercial properties.

This agreement further enhances Utiligy's capabilities as a holistic energy management solutions provider following on from our recent announcements of a strategic alliance with Carbon Planet and \$16 million of projected sales in new metering projects over the next two years.

The sale of Ecobulb™ products complements our core activity in energy management and is another way in which Utiligy is bringing together a suite of solutions to help our clients manage and minimise their energy consumption.

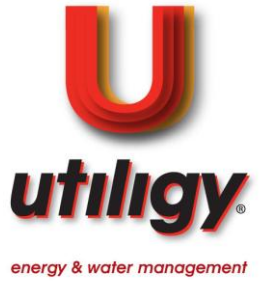

**About Intermoco Limited** Intermoco is an Australian public company listed on the Australian Stock Exchange (Code: INT) based in Melbourne. The company is a leader in the provision of remote monitoring and control technology solutions through its Utiligy brand. Utiligy provides a world class end-to-end internet enabled energy metering and resource management solution to utilities, corporations, local councils and government departments to help them monitor, manage and minimise their consumption of electricity, gas and water. The Utiligy application has been successfully deployed in all major states in Australia and in Malaysia, Thailand, New Zealand and Hong Kong.
